209 Address Standardization Submission

Function

This transaction allows an address to be validated as well-formed and standardized according to the rules and requirements of the receiver. The response will provide the standardized address or a reason why the request could not be honored.

Benefits

- Standard Data Exchange
- Agreement on Common Structures:
 - Vocabulary (Life Data Dictionary)
 - Structure (Life Object Model)
 - Support Unique Requirements in Standard Way
 - Eliminate Custom Data Feeds
- Model-Driven Architecture
 - Provides Common Architecture to All Messages
 - Encourages Reusable Components
 - Results in Reusable Code and Development

EDI to XML Mapping

- There is no equivalent EDI mapping for these messages.

Additional Information

- This transaction allows the Address/AddressValidInd to be set to true in any transactions that follow.
- May be used to standardize the address utilizing third-party solutions such as LexisNexis.
