

RNAIG Educational Sessions

[Status Update](#)

Building a stronger community through knowledge sharing

The first module in a series of 5 Ruschlikon North America Implementation Group (RNAIG) training modules kicked off on the 13th of September, as an initiative to help provide training and support for new and prospective RNAIG members in the Americas market.

Whilst applicable for all Ruschlikon members, the modules have been developed specifically for members who have not yet or partially implemented or those who would like to brush up on their understanding of Ruschlikon.

The driving force behind these modules is to *"provide our new & prospective members with a deeper understanding of ACORD and Ruschlikon and these modules will cover a number of topics to help them understand the benefits of and the how of implementation. Along with building a larger RNAIG community"*

- Sergio Ibanez, Swiss Re and RNAIG Co-Chair

The training modules will be delivered virtually in a 60 - 90 minute webinar (in an America friendly time zone), covering technical content with interactive Q&A sessions at the end.

The first module had speakers from ACORD, Aon, The Hartford and Munich Re. It covered the various perspectives from these Ruschlikon members, highlighting through case studies the sender and receiver benefits to implementing all Ruschlikon ACORD message types.

A second training module is scheduled for 10th November, where there will be another great line up of speakers with a focus on the topic of the Implementation Roadmap. This will detail how members can maximise the benefits, along with establishing solid project plans that have key milestones and best practices applied.
