

Ruschlikon Case Study Deep Dives Series 2022

Status Update

Regular 30-minutes interactive Ruschlikon webinars

As per feedback from the Ruschlikon webinar series last year, the individual case studies shared by different industry partners are very insightful and highlight tangible Ruschlikon benefits. The case study owners are happy to elaborate on the why, the how, and the what for the implementation in short webinars. They will also share information on pitfalls, lessons learnt and outline IT pre-requisites. By defining a specific scope for a particular case study, measurable KPIs can be shared and will help interested parties to build up their own business case.

In the interactive sessions, there will be enough time to raise questions to the presenter(s).

Watch out for upcoming webinars

The Ruschlikon Case Study Deep Dive Series will kick off in late Q1 2022. Make sure you stay informed by either following the [Ruschlikon LinkedIn page](#) or by subscribing to Ruschlikon event promotions through contact@ruschlikon.com.

The following Case Study Deep Dive webinars are under preparation:

- Case Study WTW (Willis Towers Watson) – 2016-10 GRLC ACORD Standards (brokers as sender)
- Case Study AXA XL – EBOT Trading model (insurer as receiver)
- Case Study Mapfre Re – Ruschlikon Lite (insurer as sender)
- Case Study Aon – Practical Deployment of CMM (brokers as sender)
- Case Study Swiss Re – TA (EBOT) & Claims (ECOT) w/broker (reinsurer as receiver)

Each session will cover Ruschlikon in a nutshell, showcase the value creation of Ruschlikon for eAccounting and Claims through the case study and finish off with an interactive Q&A.

The Ruschlikon community continues to work on additional case studies, illustrating learning experiences and providing insights into the achieved results. These will be published and showcased as they are completed and signed off.

Ruschlikon Marketing Group, on behalf of the Ruschlikon eAccounting & Claims Steering Committee
